## Project Title

Personalized Travel Itinerary Planner

## User Journey Overview

The customer journey is divided into 6 key stages, from initial discovery to post-trip usage.

## Stage 1: Discovery & Registration

| Aspect | Details |
|---|---|
| Action | User visits the app URL, sees the scenic login page |
| Touchpoint | Login Page with travel-themed SVG background |
| User Goal | Create an account to start planning a trip |
| Experience | Clicks "Sign up" link, fills in email + password + display name |
| Emotion | Curious, hopeful |
| System Response | Supabase Auth creates account, auto-creates profile via DB trigger, redirects to dashboard |

## Stage 2: Trip Creation

| Aspect | Details |
|---|---|
| Action | User clicks "New trip" on the dashboard |
| Touchpoint | New Trip Form (NewTripPage) |
| User Goal | Define trip parameters for AI generation |
| Experience | Fills in destination, dates, budget, currency, group size, travel style, interests, and notes |
| Emotion | Excited, anticipatory |
| System Response | Form validates inputs using Zod schemas on the frontend |

## Stage 3: AI Itinerary Generation

| Aspect | Details |
|---|---|
| Action | User clicks "Generate itinerary" |
| Touchpoint | Loading spinner with "Generating your itinerary..." message |
| User Goal | Receive a personalized, day-by-day travel plan |
| Experience | Waits 10-30 seconds while AI processes; spinner animation keeps them engaged |
| Emotion | Anticipation turning to delight when results appear |
| System Response | Backend calls Gemini/Groq LLM, validates JSON output, saves trip + days + activities to Supabase, returns complete itinerary |

## Stage 4: Itinerary Review & Customization

| Aspect | Details |
|---|---|
| Action | User browses the day-by-day itinerary |
| Touchpoint | Trip Detail Page (TripPage) |
| User Goal | Review and customize the generated plan |
| Experience | Navigates between days using day buttons, views activity cards with type, time, location, description, and cost |
| Emotion | Satisfied, in control |
| System Response | Displays sorted activities with costs, day summaries, and budget comparison |

## Stage 5: Activity Management

| Aspect | Details |
|---|---|
| Action | User edits, deletes, reorders, or regenerates activities |
| Touchpoint | Activity cards with Edit/Delete/Drag buttons; Regenerate day button |
| User Goal | Fine-tune the itinerary to their exact preferences |
| Experience | Clicks Edit to modify activity details in a dialog; drags to reorder; clicks Regenerate day for a fresh AI plan |
| Emotion | Empowered, creative |
| System Response | PATCH/DELETE API calls; drag-and-drop uses dnd-kit library; regeneration calls AI for one new day |

## Stage 6: Dashboard & Trip Management

| Aspect | Details |
|---|---|
| Action | User returns to dashboard to view all trips |
| Touchpoint | Dashboard Page (DashboardPage) |
| User Goal | Manage multiple trips, delete old ones |
| Experience | Sees trip cards with destination, dates, and budget utilization; can delete trips |
| Emotion | Organized, satisfied |
| System Response | Lists all user's trips with estimated cost vs. budget |
